

Lutterworth Ecolighting shines light on Culina's showpiece 280,00sq ft Distribution centre

Culina Logistics Limited is the leading provider of high quality logistics services for food and drink companies in the UK. Specialising in the development and implementation of total supply chain solutions for major or niche ambient and chilled brand manufacturers and distributors.

Energy-efficient lighting specialist Lutterworth Ecolighting have recently completed the installation of a LED lighting system for the new 280,000sq.ft facility in Port Salford

Following a rigorous Tender process whereby the chosen supplier was to provide a full all inclusive project managed service from consultation to supply, fit and warranty, Culina chose Lutterworth Ecolighting as their preferred supplier & installer to best deliver their requirements.

The initial brief and aims of the project were as follows:-

- Minimise site running costs
- Reduce maintenance costs
- Maintain specific lighting levels and uniformity conditions
- Optimise light through specification of appropriate products

As a leading UK logistics operator specialising in chilled and ambient food distribution, Culina Logistics operates with a responsible commitment to the environment, as part of this Culina aims to reduce its energy usage on a year-by-year basis.

The site will benefit from significant energy savings over conventional lighting, reduced carbon emissions, superior lighting levels, an enhanced working environment and improved health and safety, additionally reduced maintenance costs are also a huge benefit.

Notes to Editor

Lutterworth Ecolighting designs, manufactures and installs energy-efficient lighting solutions in warehousing and industrial operations throughout the UK.

The company's fully automatic lighting systems only operate when required by incorporating individual motion detection and daylight dimming technology. This results in customers regularly achieving savings of more than 70 per cent in energy costs.

Offering a full turnkey service that includes site surveys, design, installation, warranty and after sales care, Lutterworth Ecolighting is a member of the Lighting Association and Electrical Contractors' Association and employs its own qualified engineers.

As a Part L registered company, its comprehensive range of light fittings assists in meeting the demands of Part L Building Regulations.

Established in 1971 as Lutterworth Electrical, the privately owned business re-branded as Lutterworth Ecolighting in 2010 in response to growing demand for their energy efficient lighting solutions.
