Annual Lighting cost	£41,654	£12,872	£28,782	69%
Annual CO2 consumption	190,527	58,876	131,651	69%

Tiger Trailers is a privately owned, family business and is rapidly growing into one of the UK's leading commercial vehicle body and trailer manufacturer, Tiger has and continues to attract a high profile and diverse range of customers, from the haulage, logistics, retail and parcel sectors of the industry.

Already using the latest state of the art equipment, the management team engaged Energy-efficient lighting specialists EcolightingUK to give advice on the potential energy saving opportunities in their Winsford Facility.

Following several meetings, EcolightingUK were awarded a contract to remove the previously installed metal halide fittings and install LED lighting across the site.

EcolightingUK specified their PEGASUS 250w LED Multibay light across the facility each with its own built in programmable high bay PIR & daylight harvesting sensor

A return on investment is forecasted in 1.3 years, Light levels were also significantly increased in all areas providing a better working environment. The team in the welding bays were particularly pleased with the increase in light levels.

Before & After During installation
