Annual KWh consumption	218,150	101,849	116,301 53%
Annual Lighting cost	£17,911	£8,362	£9,459 53%
Annual CO2 consumption	118,674	55,406	63,268 53%

Bristol Port is Britain's most centrally located deep sea port bringing ships closer to the centre of the UK. Privatised in 1991, Bristol Port remains a privately owned independent business with the entire 2,600 acres of dock estate zoned for industrial use.

After a major tender process, Lutterworth Ecolighting was invited to install their lights at shed 4B. The brief was simple, increase our light levels two fold and save us money.

The old lighting consisted of 400w sodium fittings, these were replaced with our **Ecolite Industrial Hi-Saver** 4x80w with PIR for the open areas and our **Rackmaster** 4x80w with PIR for the racked areas.

All concerned are delighted with the results and more building are planned for the future.

Ongoing maintenance of the new system will greatly reduce the impact on the operation as lamp life is expected to last over 10 years.
